

```
#include <stdio.h>

int main(){
    int m, d, y, i; //variables
    while(i < 10){ //loop
        printf("Enter a date(m/d/y):\n"); //input
        scanf("%d/ %d/ %d/", &m, &d, &y); //takes the input and
put them into variable
        getchar();
        printf("Mo %d - Day %d - Ye %d\n", m, d, y); //output
        i++;
    }
}
```
